

## BALLETTO Oceľový dekoračný kužeľový stĺp

### Informace:

#### CHARAKTERISTIKA STĚPA

- dekoračné oceľové stĺpy verejného osvetlenia
- pozinkovaná oceľ v súlade s normou EN ISO 1461
- možnosť maľovania práškovou metódou podľa palety farieb RAL
- montáž na prefabrikovaný betónový základ
- na zákazku možnosť vyhotovenia podľa individualného návrhu
- na objednávku možnosť výroby aj v iných výškach

BALLETTO S                      Tabuľka s geometriou stĺpa

|                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |                                                                                   |
